Employability

“To help everyone with a learning disability or autism embrace new opportunities, lead the fulfilling lives they want and actively contribute to their local community.”

Equip Education

Equip works with young people with an Education Health Care Plan to provide support in education and life skills.

Equip aims to help young adults improve their life skills, giving them the self-assurance to be more independent.

The Equip Project works with young people up to 25 years old with a learning disability and those with Autistic Spectrum Disorder.

Equip focuses on delivering bespoke activities that provide educational, vocational and social learning opportunities, as well as the practical application of essential life skills. We work in a variety of ways, including 1:1, groups, and work experience, all designed to develop life skills, independence, confidence and self-esteem.

For more information please get in touch with Deborah Baker on 07419 989003 or deborah.baker@talkback-uk.com
